

October 25th, 2010

Dear David DeHart and the DeHart Construction crew,

Our family is so grateful for the comfort and ease that you and your company gave us during our uncertain time of need after a tornado hit our home on June 5th, 2010. Our family has never been through such a devastation of this magnitude (of which we realize is minimal compare to the catastrophic events that many people go through). Through God's grace no one in our community was injured. We didn't even know where to begin after the tornado. After several visits from contractors and then receiving only a few estimates, you (David) came to our rescue. We had questioned several contractors about a steel roof and no one would even entertain a quote, replying "it is going to cost too much"...and yet you gave us samples of a steel roof the same day we asked about it. We had several people walk around the house to estimate the damages but you were the only one that actually went into the infrastructure of our home to check for internal damage. You didn't miss a beat! Not only were you thorough but your crew was unbelievable! You worked hand in hand with your foreman Daniel to make sure every detail was taken care of. Our home is not only put back together, but put back together more structurally sound than when we purchased our home. You and your crew have excellent craftsmanship and were so easy to work with. We have recommended you and your crew to several of our friends and feel extremely fortunate that you came to our home when you did.

Sincerely-

Greg & Holly Davis

Greg and Holly Davis
